

Arthur Buis

AI · DATA SCIENCE · COMPUTER VISION · LIFE SCIENCES

École Polytechnique graduate engineer in applied mathematics and computer science, currently starting a **M.Sc. in Bioinformatics at DTU**, I am looking for a **part-time student assistant position in AI / data science** in Copenhagen, ideally in healthcare and life sciences.

MY PORTFOLIO

arthur-buis.netlify.app

A broader view of my profile and projects, with code and reports.

EDUCATION

M.Sc. in Bioinformatics

Sep 2026 – Aug 2028

Technical University of Denmark / Lyngby, Denmark

- Specialised track in **AI for Life Sciences, Computational Biology and Genomic Data Analysis**

Current courses: Computational Precision Medicine · Introduction to Systems Biology · Advanced Modeling of Infectious Diseases · R for Bio Data Science · Quantitative Methods to Assess Sustainability

Engineering Degree, Master's level

Sep 2023 – Aug 2026

École Polytechnique / Paris, France

- France's top-ranked engineering university, with admission by **competitive national examination**
- Track in applied mathematics, computer science, artificial intelligence and biology
- CGPA 3.91/4, GPA 3.82/4**

Coursework: Machine and Deep Learning · Computer Vision · Multimodal Generative AI · Optimisation · Statistics · Graph Data Science · Parallel Computing · Molecular and Cell Biology

Preparatory classes MP2I / MPI

Sep 2021 – Jul 2023

Lycée Aux Lazaristes / Lyon, France

- Two years of intensive pure mathematics, physics and computer science, preparing the competitive national entrance exams to the French engineering schools. **GPA 4.0/4**

EXPERIENCE

Computer Vision Engineer Intern

Mar – Jul 2026

Noro / New York, USA

- Developed a **real-time, multi-camera panorama stitching pipeline** for immersive video-conferencing portals
- Integrated **segmentation functionalities** using **OpenCV** and **YOLO** models to handle parallax due to people or moving objects
- Conducted **literature review of 10+ computer vision papers** to design the production pipeline

NLP Engineer Intern

Jun – Sep 2025

Arkhn / Paris, France

- Deployed NLP pipelines using **Large Language Models** tailored for **medical text generation** and synthesis
- Integrated advanced models into a **hospital production environment** adhering to healthcare data regulations, using **vLLM**
- Refined conversational agent architectures to optimize **medical data extraction from unstructured clinical records**

Officer Cadet, Platoon Leader

Dec 2023 – Mar 2024

French Army, Adapted Military Service Regiment / New Caledonia

- Led a platoon of 30+ recruits** through their initial military training
- Participated in recruitment missions within tribal communities in New Caledonia

ACADEMIC PROJECTS (my code and reports are available on [my portfolio](#))

Human Motion Analysis

Sep – Dec 2025

Automated posture assessment pipeline for fitness exercises from video, without any specialised equipment

Classifying X Users: Influencers vs Observers

Sep – Dec 2025

Kaggle data challenge focused on predicting whether an account is an influencer, from the text and metadata of its posts

Construction and Analysis of Similarity Graphs

Mar – May 2025

Mapped the French-speaking rap scene as a network from data scraped on the web, then surfaced its sub-genres with community detection

Large Language Models for Code Generation

Sep 2024 – May 2025

Research project tutored by Lokad: getting a language model to write and fix code in a language almost absent from its training data

Multi-objective Optimisation of Urban Trail Routes

Sep 2022 – Jun 2023

Generating looped running routes that match both a target distance and elevation gain, from map data alone

SKILLS

Computer vision

OpenCV, YOLO, MediaPipe, Segmentation, Stitching

Programming languages

Python (advanced), OCaml, C, Java, R, SQL, TypeScript, JavaScript

Machine and deep learning

PyTorch, TensorFlow, Scikit-learn, RNN, LSTM, Transformers, VLM

Data science

Data analysis, Web scraping, Graph databases, Signal processing

Tools and computing

Git, GitHub, Docker, Linux (shell), Sturm, MPI, OpenMP, CUDA

LLMs and NLP

RAG, LangChain, vLLM, Word embeddings

LANGUAGES

French — native

English — fluent, C1 (TOEFL iBT 106/120)

Spanish — intermediate, B2

BEYOND WORK

Two-time winner of the national **Archimède** maths competition (1000+ entrants); two years tutoring maths and CS.

Former vice-president of **Atelier Des Ondes**, running concerts and live sound at École Polytechnique. Rock/pop drummer.

Competitive long-distance runner, **20+ trail and urban races**.
